Experience the POWER of Standardization.

FDA Approved: The RIGHT Products for the RIGHT Exam

The ONLY Contrast Validated for Standardized, Well-Tested Protocols During Modified Barium Swallow Studies (MBSS)

The POWER of Consistency in MBSS
Developing standards for the MBSS is a key concern throughout the Speech/Language Pathology (SLP) community. The VARIBAR products were developed in cooperation with SLPs to help standardize diagnostic materials for accurate comparisons between studies.

The ONLY Premixed*, Premeasured, and Precise Barium Preparations for MBSS that may:
- Enable reproducible results
- Support high-quality imaging
- Reduce preparation time and wasted materials
- Avoid undesirable coating inherent to traditional GI barium sulfate preparations

INDICATIONS AND USAGE:
VARIBAR® THIN HONEY (barium sulfate) oral suspension, VARIBAR® NECTAR (barium sulfate) oral suspension and VARIBAR® THIN LIQUID (barium sulfate) for oral suspension, are indicated for use in modified barium swallow examinations to evaluate the oral and pharyngeal function and morphology in adult and pediatric patients. VARIBAR® HONEY (barium sulfate) oral suspension and VARIBAR® PUDDING (barium sulfate) oral paste are indicated for use in modified barium swallow examinations to evaluate the oral and pharyngeal function and morphology in adult and pediatric patients 6 months of age and older.

IMPORTANT SAFETY INFORMATION:
For Oral Administration. This product should not be used in patients with known or suspected perforation of the GI tract, known obstruction of the GI tract, high risk of aspiration, or hypersensitivity to barium sulfate products. Rarely, severe allergic reactions of anaphylactoid nature have been reported following administration of barium sulfate contrast agents. Aspiration may occur during the modified barium swallow examination, monitor the patient for aspiration.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit https://www.fda.gov/Safety/MedWatch/default.htm or call 1-800-FDA-1088.

VARIBAR® THIN LIQUID (barium sulfate) for oral suspension is supplied as a powder and reconstituted to a standard volume with water.

All images shown are representative images from referenced studies. Individual results may vary.
**Varibar® (barium sulfate)**

The ONLY Products FDA Approved and Indicated for Modified Barium Swallow Studies.

### Standardization Helps YOU Help Your PATIENTS

The VARIBAR line, with standardized viscosities, consistently addresses the most important needs in Modified Barium Swallow Studies:

<table>
<thead>
